OBJECTIVE

Full-stack developer with 2.5 years of experience building scalable applications using Angular, React, Node.js, Express, MongoDB, MySQL, REST APIs, and AWS. Strong in UI development, API architecture, performance optimization, cloud deployment, and delivering end-to-end features with clean, maintainable code. Also experienced in embedded engineering using C/C++. Seeking a full-stack role to build impactful, production-grade systems.

EDUCATION

B.Tech, MIT WPU 2019-2023
Coursework: Electronics and Communication Engineering.

SKILLS

Frontend:	Angular, React, JavaScript, TypeScript, HTML5, CSS3, Bootstrap
Backend:	Node.js, Express.js, REST APIs, Microservices
Database:	MongoDB, MySQL, PostgreSQL, Firebase
Cloud & DevOps:	AWS (EC2, S3), CI/CD, Git, GitHub, Vercel, Render
Programming:	Java, Python, C++
Tools:	Postman, Figma, Jira

EXPERIENCE

Software Developer Jul 2023 – Present
Borosil Scientific Ltd *Pune, Maharashtra*

- Engineered 0.03 ml precision Digital Burette system using C/C++ improving accuracy of measurements.
- Built optimized magnetic stirrer motor-control logic improving cycle stability by 18 %.
- Deployed systems across institutes including the Serum Institute of India with successful installation and calibration.
- Maintained engineering documentation via GitHub + Dassault 3DExperience.

Full-Stack Developer Oct 2021 – Mar 2022
Stardust Impex *Pune, Maharashtra*

- Built a full-stack web platform using Angular, Node.js, Express, and MySQL replacing the old static system.
- Developed secure REST APIs for media, forms, and content management.
- Delivered responsive Angular UI increasing mobile engagement by 40%
- Created technical documentation and managed product lifecycle data using GitHub and Dassault 3D Experience.

PROJECTS

AI Media Generation Platform

- Built a production-grade AI media generation platform using Angular and Node.js with Gemini API integration.
- Implemented Firebase authentication, real-time media storage, and scalable REST API architecture. .
- Improved UI load speed by 35% via optimized build pipelines.

Tech: Angular, Node.js, Firebase, Gemini API, TypeScript, REST APIs
